

It's The Basics—Kinked Lines

IT'S THE BASICS....
NEVER BE COMPLACENT

Don't Pass Over a Kink in a Hoseline

LOSS in GPM and reduced nozzle pressure may result in ineffective fire attack.

STRAIGHTEN ALL LINES: SUPPLY AND ATTACK

If this lead-out is not played out correctly, the nozzle will not flow an effective hose stream.

Always Straighten A Kinked Line

Have The Courage to Be Safe
Initiative 4: YOU are EMPOWERED to STOP UNSAFE practices.
