

Back to Basics

Hosebed Knowledge

Task

(Minimum Standard)
Identify all hosebed contents by length, size, nozzle type, finish, & use

(Highly Skilled Level)
Identify all tip pressures for nozzles and net discharge pressure of each line

Skill Tips

- Know the name of each hosebed and how it is to be deployed, what discharge is it hooked to
- How many members are needed to pull each bed and what should their positions on the line be
 - Make sure beds are pulled completely and played out before charging
 - Never pass a kink in a line, always straighten the line out

Competency

Be able to recall all hosebed lengths and sizes with their intended uses.

Know the correct nozzle pressure and gpm flows for each nozzle/line.

Application

Each hose bed has characteristics for pulling, leading out, rebedding and for tactical application. Be proficient in the length, gpm, nozzle, bed finish for all types of hose beds on all of your apparatus.
