

Back Pocket Drill

BPD6

Rapid Intervention 20 Second Team Drill

Without any coaching assign two FF's to be the RIT. FF's acquire equipment, supplies and assemble at a designated predetermined location.

When team is assembled at location implement a mayday call. Start the clock. The goal of the exercise is for the two FF's to be fully deployed within 20 seconds, fully dressed on SCBA air and at the door of the structure with equipment and supplies to begin interior operations. When the team arrives and touches the door timing stops.

Conclude drill.

- Debrief.
- Ask firefighters to remove gear.
- How long did it take to be deployable?
- What worked?
- What did not work?
- How do we fix the identified problem(s)?
- Conduct the drill again!
