

BACK POCKET DRILL

BPD2

Instructors and FF's are highly encouraged to be in full PPE including SCBA on their back. The SCBA should have been donned including face piece donning and seal check. This creates habits that allows the brain to understand the PPE ensemble is part of the skill.

- FF's retrieve adjustable 1.5" or 2.5" gallonage nozzle from apparatus.
- FF's close eyes and adjust the flow to highest level.
- FF's adjust fog pattern for wide fog and straight stream.
- FF's what is the highest flow from the nozzle in their hand - w/o looking at the nozzle?

If FF's don't know answers coaching should occur.

Hand FF a male/female coupling attached without hose is preferred. FF explains the direction to the door for exiting a structure.

FF's attach large diameter suction hose to pump inlet.

FF's attach large diameter intake hose to suction inlet.
