

BACK POCKET DRILL

BPD3

This is a brief discussion of what a FF carries in/on their PPE and why?

Bring a group of FF together and ask each of them to share: What are you carrying in your PPE pockets?

Answers will range from

- Gloves
- Hood
- Spanner Wrench
- Flashlight
- Webbing (25-50')
- Door Chock
- Channel Lock
- Cable Cutter
- Utility Knife
- Screwdriver
- Ear Plugs
- Seat Belt Cutter
- Rescue Hammer
- Window Punch

***All tools carried on/in your PPE should be retrievable and used with gloves on.

There is no right answer. Each FF makes a judgement decision based upon their personal preference. There are some tools that might be specific to the apparatus they are assigned.
